## PROFESSIONAL SUMMARY

Final-year B.E. Computer Engineering student at SPPU with strong hands-on expertise in AWS cloud infrastructure, DevOps tooling, and web development. Independently designed, developed, and deployed cloud-native applications using EC2, DynamoDB, SES, and Route 53. Experienced in containerization and CI/CD pipelines with Docker, Kubernetes, and Jenkins. A consistent academic performer (CGPA 8.62) with a proven ability to evolve and improve technical solutions across project iterations.

## TECHNICAL SKILLS

**Languages:** Python, C/C++, SQL, XML, JavaScript  
**Frameworks & Libraries:** Flask, NumPy, Pandas, matplotlib, Bootstrap 5  
**Cloud (AWS):** EC2, S3, DynamoDB, RDS, IAM, SES, Route 53, CloudWatch, Billing & Cost Management  
**DevOps & Tools:** Docker, Kubernetes, Jenkins, Git, GitHub, Linux, VS Code  
**Web Dev:** Web Application Development, Deployment & Server Management on AWS  
**Productivity:** MS Office — Word, Excel, PowerPoint, Outlook  
**Core CS:** DBMS, OOP, Computer Networks, Operating Systems

## ACADEMIC COURSEWORK

- DBMS · Web Technology
- DSA · Artificial Intelligence
- SQL · Computer Networks

- Designed and built an IoT system that autonomously tracks sunlight using 4 LDR sensors for maximum solar energy capture.
- Integrated servo motors for real-time solar panel orientation adjustment and assembled full hardware circuit with ICs and support components.
- Powered the system via a rechargeable battery with DC-DC booster and 5V solar panel in a complete closed-loop hardware setup.
